Table EC14a: *A school voucher system allows parents the option of sending their child to the school of their choice, whether that school is public or private, including both religious and non-religious schools. If this policy were adopted, tax dollars currently allocated to a school district would be allocated to parents in the form of a 'school voucher' to pay partial or full tuition for the child"s school. In general, what is your opinion of school voucher systems?*

Table EC16a: *An "education savings account" in K–12 education – often called an ESA – establishes for parents a government-authorized savings account with restricted, but multiple uses for educational purposes. Parents can then use these funds to pay for: school tuition; tutoring; online education programs; therapies for students with special needs; textbooks or other instructional materials; or save for future college expenses. In general, what is your opinion of an ESA system?*

Table EC269: *A 'refundable tax credit' is a refund payment to taxpayers from the government for qualifying expenses, even if taxes owed are less than the refund amount. A refundable tax credit in K-12 education would allow families to cover qualifying education expenses, such as private school tuition and fees, tutoring, textbooks, standardized assessments, or homeschooling costs. In general, what is your opinion of refundable tax credits in K-12 education?*

Table EC269: *A 'refundable tax credit' is a refund payment to taxpayers from the government for qualifying expenses, even if taxes owed are less than the refund amount. A refundable tax credit in K-12 education would allow families to cover qualifying education expenses, such as private school tuition and fees, tutoring, textbooks, standardized assessments, or homeschooling costs. In general, what is your opinion of refundable tax credits in K-12 education?*
